

Aluminium Can Processing Solutions

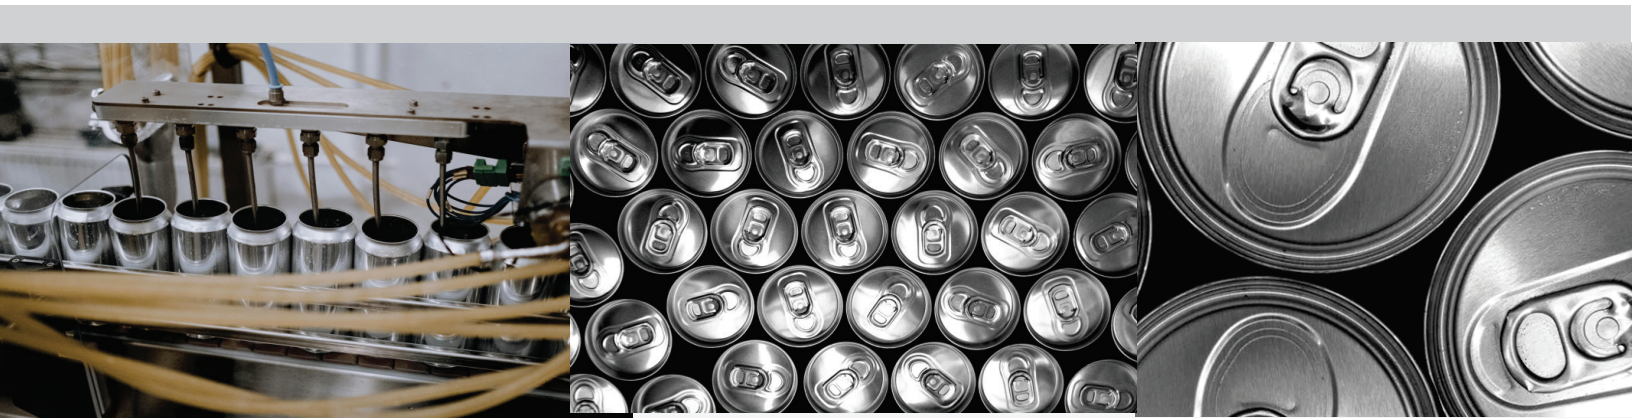

Who We Are

At Eunisell, we specialize in providing expert aluminum can processing services tailored to meet the unique needs of our clients. Our cutting-edge product technologies enable us to deliver high-quality processing solutions that enhance efficiency, reduce costs, and promote sustainability.

With a proven track record of both technical service and innovation to pace with the can makers' changing requirements, we offer full frontend solutions for two- piece aluminum and tin-plate steel cans.

Our Solutions

Products include:

Copper lubricants, Bodymaker coolants, Cleaners, Conversion coatings

These products help meet demands for environmentally sustainable products, increased line speeds, reduced maintenance and longer tool life.

Additionally, we offer a complete range of process control equipment to ensure reliable and efficient consumption of chemicals.

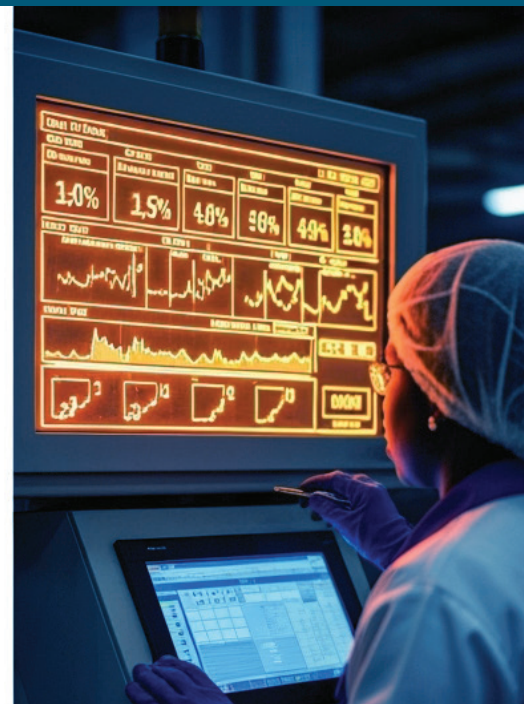

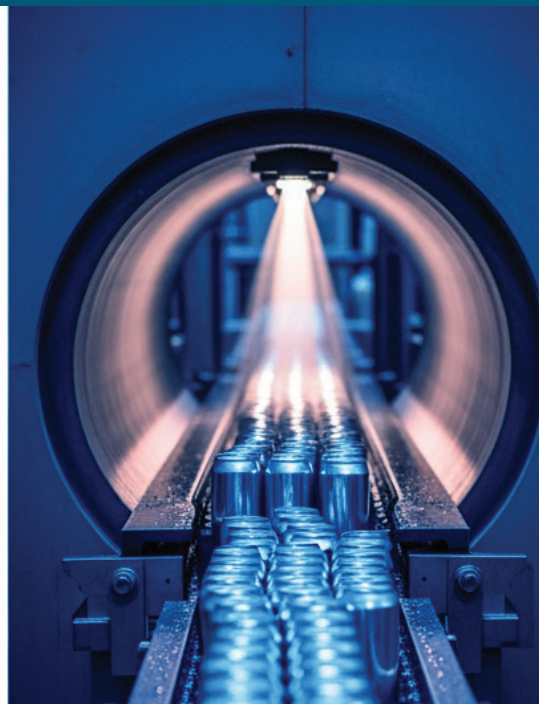

Combined with our broad portfolio of innovative chemistries, equipment solutions and unmatched technical support, Eunisell provides the total solution to optimize the process and maximize success.

Our technical service representatives provide hands-on help to ensure our customers' needs are met every day.

Our Solutions

Eunisell offers a variety of solutions throughout the Aluminium packaging value chain.

Henkel's lubricants paired with the company's washer technologies offer the packaging industry unique solutions capable of reducing overall process costs and adding value to our customers' production.

Lubricants

- Post lubricants
- Copper lubricants
- Bodymaker coolants

Washer Chemicals

- Cleaners
- Conversion coatings
- Mobility enhancers

Control Equipment

- Customized process controllers
- Sensors and probes
- Pumps

Lubricants

Copper Lubricants

Our copper lubricants are designed to handle a wide range of cupping requirements while ensuring excellent can interior cleanliness, long tool life and increased productivity.

Features and Benefits:

- Excellent productivity and tear-off performance
- High can surface finish quality and interior can brightness
- Outstanding bleedthrough protection

Lubricants

Bodymaker Coolants

We offer a wide portfolio of biostable bodymaker coolants with a range of different polymer levels to help tramp control, fine-tuned to fit each individual plant's requirements and all offering superior lubricity and corrosion protection at low concentrations.

Features and Benefits:

- Biostable formulas to reduce or eliminate tank-side additions
- Proven lubricity and detergency package
- Improved coolant control
- Low accumulation of system sludge

Washer Chemicals

Mobility Enhancers

Mobility enhancer technologies are uniquely formulated to provide excellent can mobility and water drainage. They offer environmental benefits by saving energy, with a shorter dry time at lower oven temperatures.

Features and Benefits:

- Reduced energy consumption
- Shorter dry time
- Lower oven temperature

Washer Chemicals

Conversion Coatings

Our inorganic conversion coatings chemically bond to the surface to provide protection against corrosion and staining during pasteurization and retort, and also improve adhesion of can coatings.

Features and Benefits:

- Free of heavy metals
- Superior dome stain resistance
- Improved coating adhesion

Washer Chemicals

Cleaners

our environmentally sustainable, acid cleaners are designed with highly efficient cleaning surfactants and a unique brightener technology to help reduce the requirement for fluoride encountered in conventional cleaners.

Features and Benefits:

- Free-rinsing for water conservation and reduced washer maintenance
- APE-free and fully biodegradable
- Compliant with REACH and EU detergent regulations

Steel Cans

Eunisell offers a full range of product solutions for tin-plate cans, including lubricants, cleaners and conversion coatings.

Steel Lubricant

We offer synthetic copper lubricants and bodymaker coolants for forming tin-plated steel food and beverage cans. These products are designed to disperse tin and steel fines, while minimizing build-up on tooling, to give a superior can surface finish.

Features and Benefits:

Strong Corrosion Protection - Excellent Can Stripping - Extended Tool Life

Steel Cans

Cleaners

Washer products for tin-plate steel cans clean the surface of organic lubricant soils and emulsified tramp oil.

Features and Benefits:

- Low Sludge and Reduced Scaling
- Superior Product Finish

Conversion Coatings

Our conversion coatings for tin-plate steel cans provide optimum corrosion protection, reduced metal exposure, improved coating adhesion and protection against flash rusting.

Features and Benefits:

- Improved Coating Adhesion
- Effective Flash Rust Protection

Our Customers

yes we can

Sustainability

Eunisell is founded on a deep commitment to deliver services and chemical products that consistently exceed customer expectations, while encompassing product safety and ecological compatibility.

These guiding principles of Eunisell inspire long-term customer relationships based on reliability, credibility and mutual trust.

Eunisell's Aluminium packaging product is focused on green solutions to keep pace with the changing requirements of can manufacturers, including the drive toward more environmentally sustainable products.
